

TALENTO TECH PROJECT

By Carolina Ospina
Andrés Felipe Rodríguez Agudelo

PROBLEM

In Sabaneta, the residents and visitors don't easily find products, businesses, and local services due to the scattering, don't have data uploads, and have low digital visibility of the commercial offer.

OBJECTIVE

Make stronger the local business and the urban experience with a digital platform that connects the offer with the supply, aligned with the city strategist (Smart City).

¿ Que tienes
para mi
Sabaneta ?

SOLUTION

An intelligent recommender based in AI and PLN that centralizes the business information from Sabaneta, making it easy to search and connect citizens and local businesses.

models.py

- Define the model business.

views.py

- Upload and clean the data.
- Text vectorization with TF-IDF
- Recommendation function

urls.py

- Defines the path to the recommender

Attraction

- Friendly Web/Mobile Interface (Release 2)
- Personality searching with IA.
- Update business database
- Platforms integrate with Sabaneta App (release 2)

EXPECTED IMPACT

WHY NOW?

Sabaneta is a leading city in digital transformation. This project consolidates this and integrates the technology, community, and territory's economic development.

THANK YOU!
